

TwoSix IO

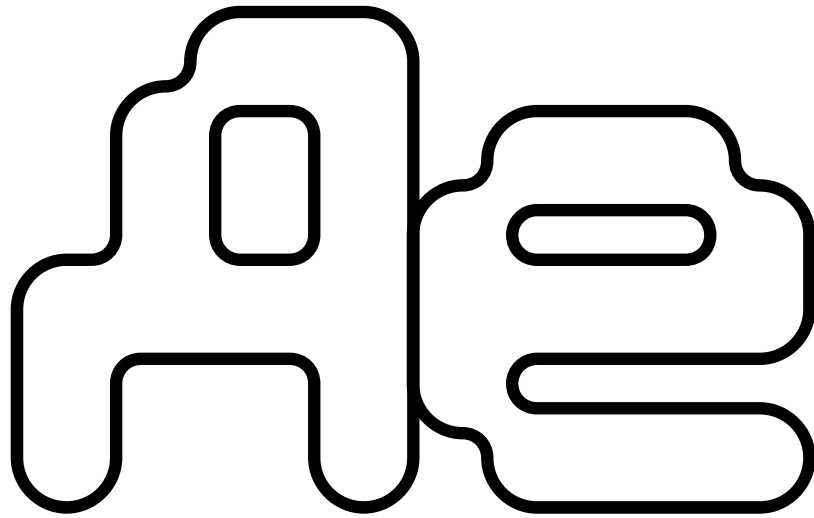

TwoSix IO Zero is an inline / outline typeface in eight weight contours that is based on MMcNTwoSix, a monospaced subgroup of MuirMcNeil's extensive Two Type System. While TwoSix Zero's armature is consistent with the system, letter spacing has been eliminated throughout so that all adjacent characters touch each other, with their outlines overlapping in precise registration.

In addition to its eight outline weights an additional solid style, TwoSix IO Zero 000, has been implemented to allow infills of colour or tone when overlaid onto its stroked counterparts.

The TwoSix IO Zero system is supplemented by TwoSix IO Mono, a set of eight monospaced fonts in the same stroke weights. The Mono variant provides compatibility with the Two Type system, where a common grid determines the positioning of letterforms, spacing and pattern panels, with every element aligning so that the superimposition of any of the system's 250+ alphabets will result in a single, unique instance taken from thousands of possible combinations.
