MuirMcNeil
Quod

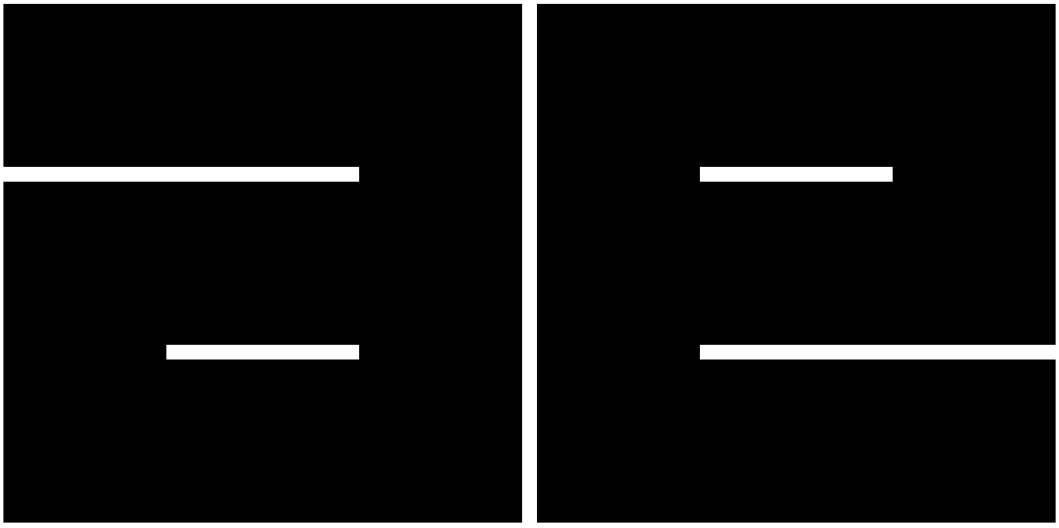

Quod is a typeface built around the square. Each character is constructed from a strict geometric vocabulary of four rectangular components, arranged at right angles to form square, monolinear and monospaced letterforms. By reducing the alphabet to fundamental components, Quod explores the potential of an exceptionally limited set of forms.

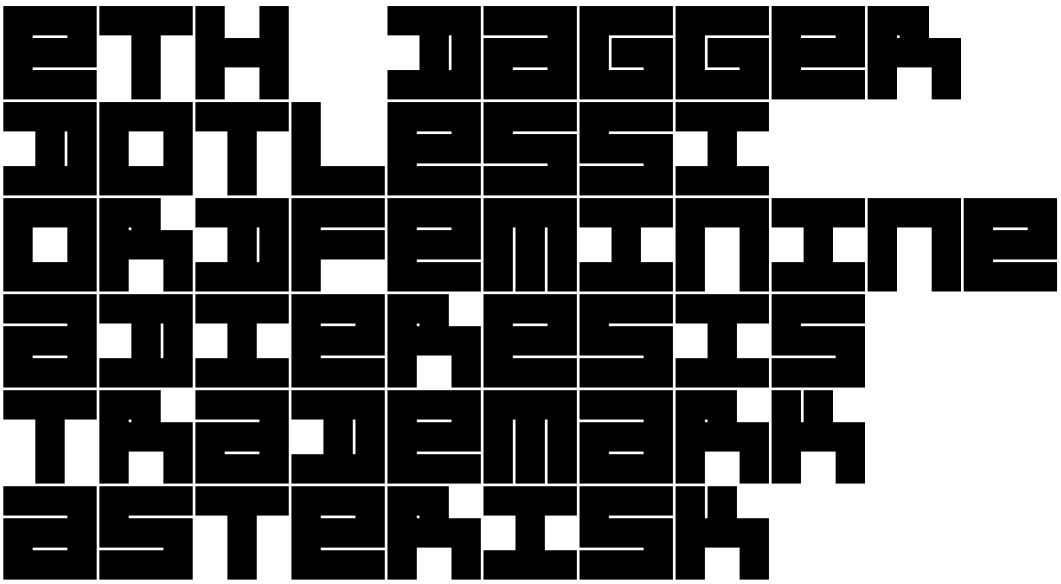

Part typographic system, part geometric game, Quod continues a recurring MuirMcNeil interest in testing the limits of the alphabet: exploring how its familiar structures can be reduced and manipulated while retaining their essential identity. The typeface comprises seven corresponding weights, together with a single modulated version.
